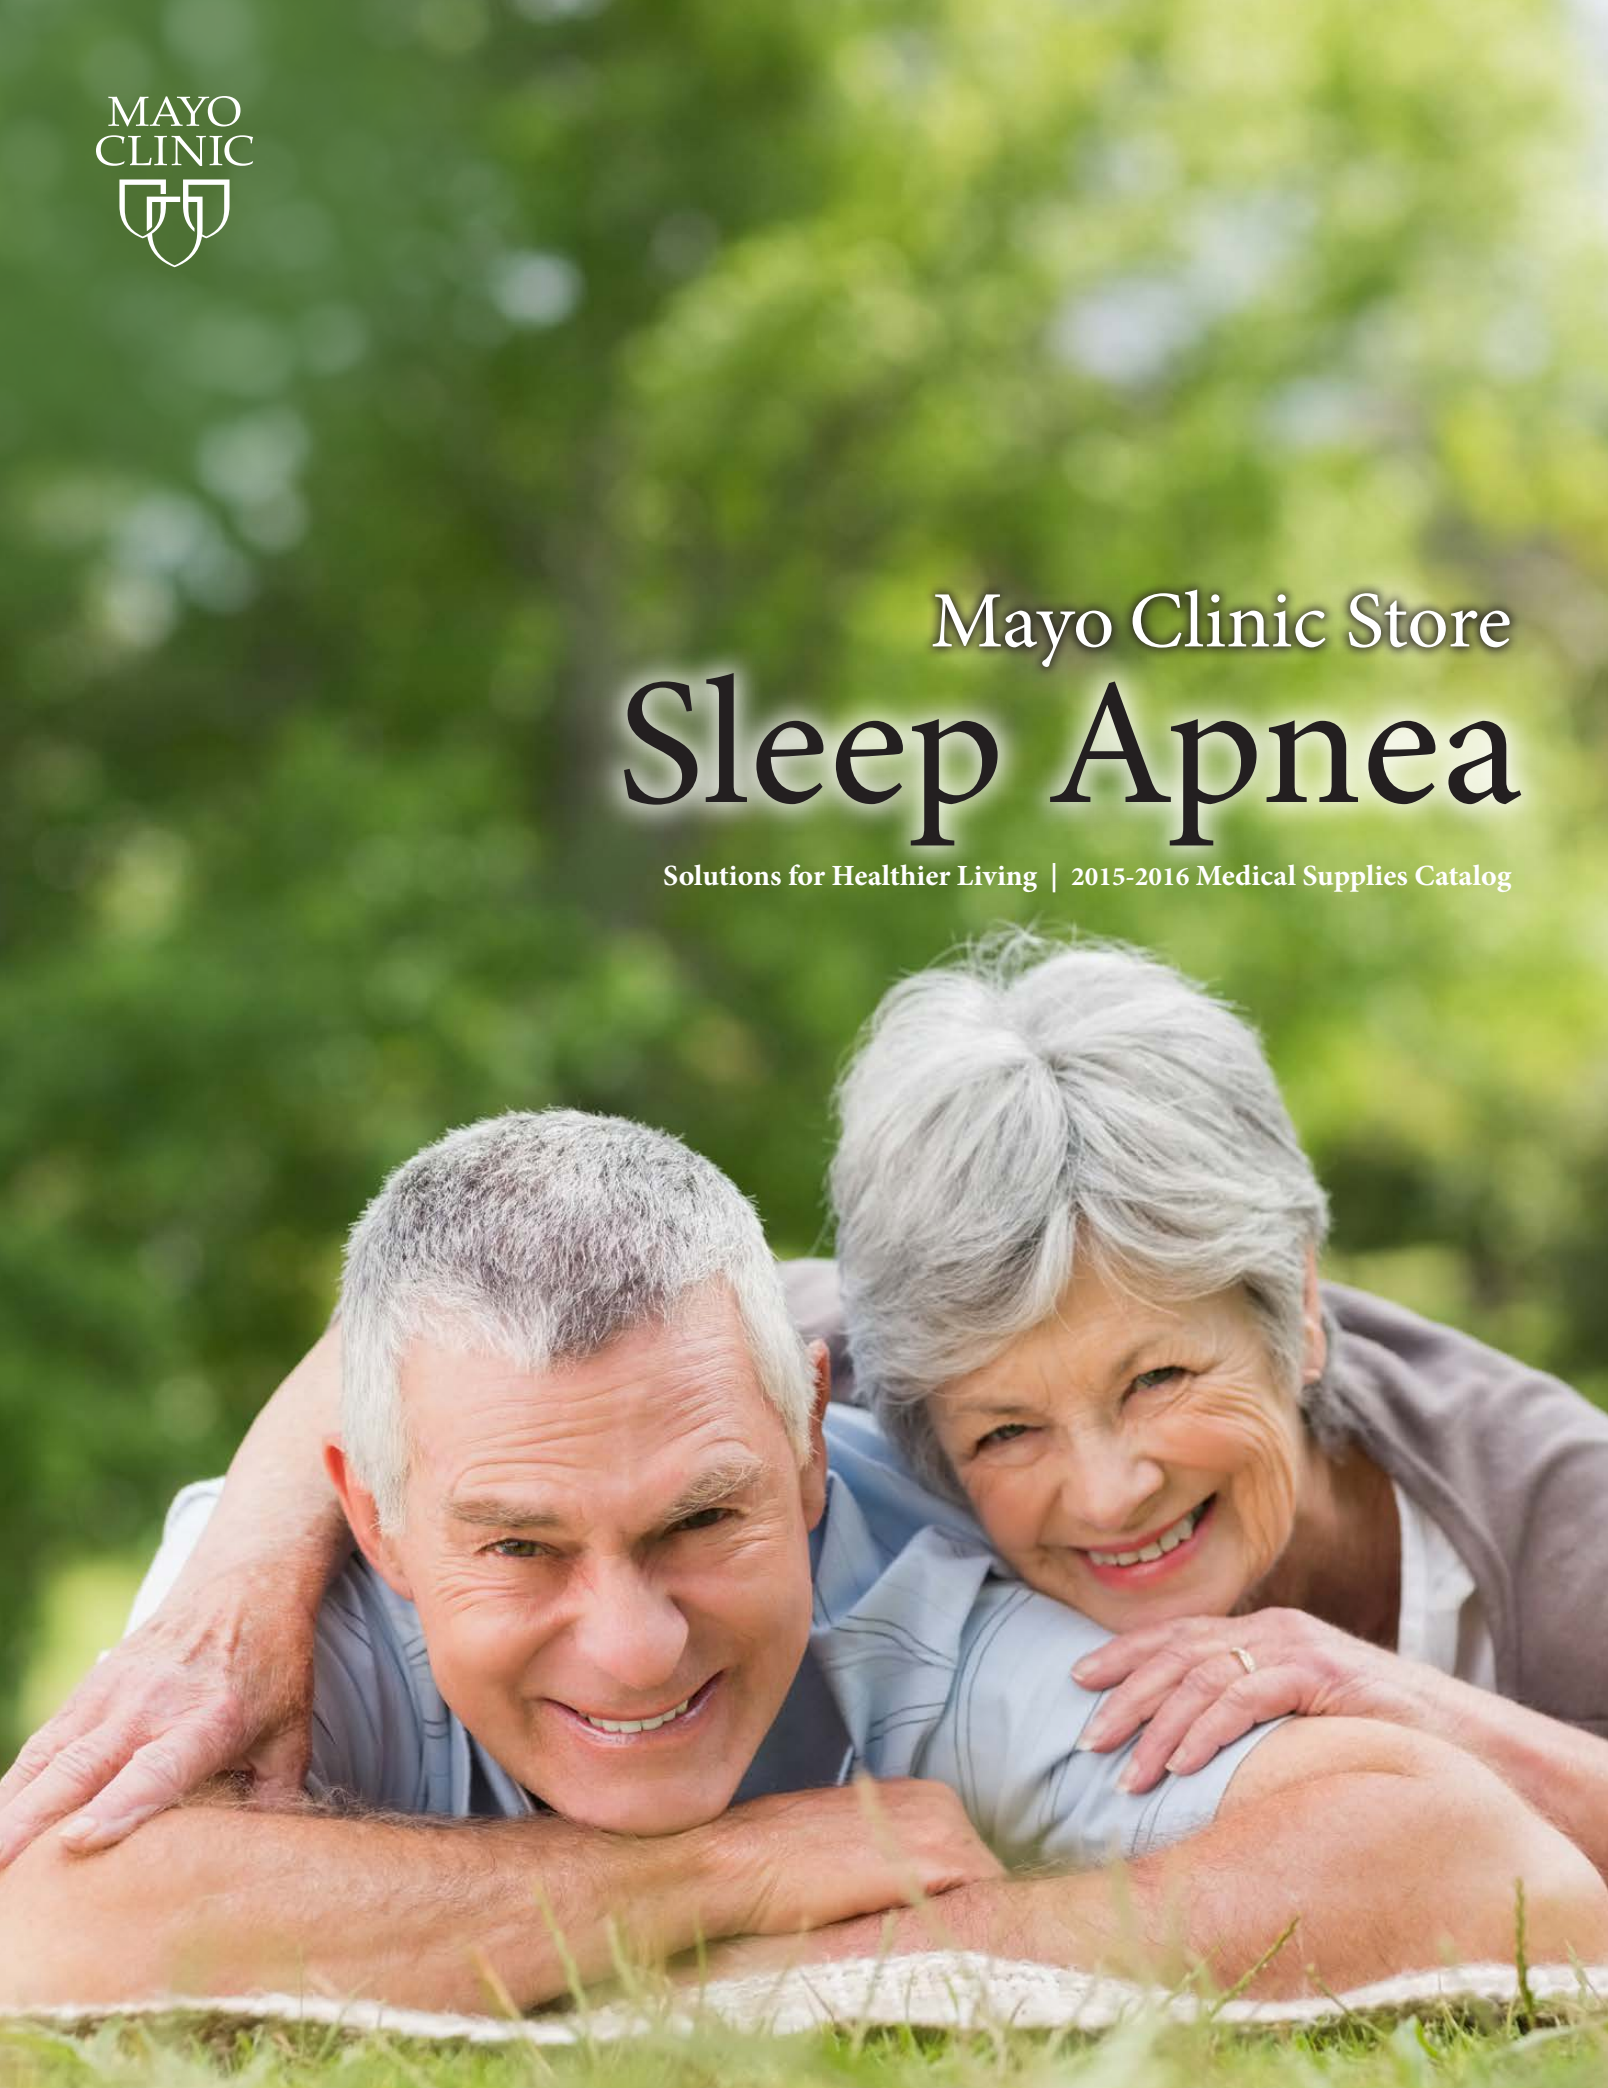
Solutions for Healthier Living | 2015-2016 Medical Supplies Catalog



Mayo Clinic Store

OFFERED FOR THE BENEFIT AND CONVENIENCE OF MAYO CLINIC PATIENTS EVERYWHERE

The Mayo Clinic Store Catalog features a variety of supplies for use. This catalog is a continuation of the service provided in the Mayo Clinic Stores and represents some of the products our physicians find most useful. Products were carefully chosen for reliability and value. As a not-for-profit organization, proceeds from products purchased in our catalog support medical education and research at Mayo Clinic. This important work helps enhance the lives and well-being of people all around the world. Established in the late 1800s by Minnesota doctors William and Charles Mayo, Mayo Clinic is now one of the world's largest group practices staffed with more than 2,000 physicians dedicated to continuing the Mayo heritage of medical excellence and to providing caring, individual attention to each patient.

Philips Respironics System One

- C-Flex and C-Flex Plus
- Optional humidifier recognizes room humidity and temperature and adjusts output accordingly; this helps to reduce nuisance condensation in the tubing
- The "Dry Box" Technology feature of the humidifier helps prevent water damage to the CPAP
- C-Flex gives pressure relief at exhalation for breathing comfort
- C-Flex Plus is an enhancement that softens the change between inhaling and exhaling
- New easy-to-use control wheel operates features and information retrieval
- A-Flex in the System One Auto device improves comfort even more by matching pressure delivery to the patient's entire breathing cycle; the device softens the pressure transition from inhalation to exhalation

Roche Home INR Testing

International Normalized Ratio (INR) home testing is a patient self-testing program that allows the freedom to monitor INR levels safely from the convenience of your own home without compromising the peace of mind of a professional assessment by your physician. Studies show that more frequent self-testing significantly decreases the onset of complications.

Benefits of INR Home testing:

- Home testing systems are portable, battery-operated instruments; from a finger-stick of blood, these products are designed to aid in the management of oral anticoagulants
- Self-testing may also provide a convenient opportunity for increased frequency of testing when deemed necessary
- The use of the same instrument may increase the degree of consistency; self-testing provides the potential for greater knowledge and awareness of therapy that may lead to improved compliance

Fisher & Paykel Masks

Zest™ Nasal Mask

Premium Frosted Silicone Seal – Optimizing seal technology

This seal technology has a soft, smooth feel to slide onto the face; its frosted texture optimizes the mask seal. The sliding Glider™ Strap provides freedom of movement while maintaining a seal. Mask force remains equal when the head rotates from side to side, minimizing the occurrence of leaks.

400HC543	**ZEST™ NASAL MASK WITHOUT HEADGEAR**	**140.95**

Eson™ Nasal Mask

F&P Eson™ is designed to perform in tune with you and your needs

F&P Eson's three key components, the RollFit™ seal, ErgoFit headgear and Easy Frame work in harmony. These three key components have been designed to deliver the comfort, seal and easy use that Fisher & Paykel Healthcare masks are known for.

1. **RollFit™ Seal** As the name suggests, the one-piece seal 'rolls' back and forth on the bridge of the nose to adjust automatically. In doing so, the RollFit™ technology reduces pressure on the bridge of the nose.
2. **ErgoFit Headgear** This breathable, ergonomically designed headgear has been designed to self-locate high on the rear of the head allowing for head movement (sideways, up and down).
3. **Easy Frame T** This low-profile frame is stable, durable and small, and ensures a clear line of sight. The one frame fits all three seal sizes and has an easy-clip frame attachment to aid assembly after cleaning.

400HC571	**ESON™ NASAL MASK, SMALL WITHOUT HEADGEAR**	**140.95**
400HC572	**ESON™ NASAL MASK, MEDIUM WITHOUT HEADGEAR**	**140.95**

Pilairo Q™ Nasal Pillows Mask

It's just what you asked for - a quieter nasal pillows mask with the option of adjustable or stretchwise headgear. This enhanced offering ensures quieter use, less draft and fits a greater range of head sizes.

Weighing in as one of the lightest CPAP nasal pillows masks (1.94 ounces/55 grams), the F&P Pilairo Q™ is quieter for the patient and bigger on performance. The clever design integrates the self-inflating AirPillow Seal and a choice between two headgear options.

400421	**PILAIRO Q™ NASAL PILLOWS SYSTEM WITH HEADGEAR**	**188.90**
400HC125	PILAIRO Q™ REPLACEMENT NASAL PILLOWS	33.95
400HC229	*DIFFUSER & COVER PILAIRO Q™ (10/PKG)*	*18.95*

Opus™ Nasal Pillows Mask

The anatomically shaped pillows provide easy fitting with an excellent seal. The contours of the nasal pillows ensure greater comfort. The range of sizes provided (S, M, L) ensures that comfort and seal are not compromised.

400HC482	**NASAL PILLOWS SYSTEM**	**188.90**

The FlexFit™ 431 (shown) comes with a small, medium & large replaceable cushion.

FlexiFit™ 431 Full Face Mask

The Fisher & Paykel FlexiFit™ full face mask comes in two versions, 431 and 432. The mask is comfortable to wear, and the cushion supports the chin to lessen the tendency to mouth breathe.

400HC503	**FULL FACE MASK WITH SMALL, MEDIUM & LARGE CUSHION WITHOUT HEADGEAR**	**225.95**
400HC112	CUSHION FLEXIFIT™ 431, SMALL	83.95

ResMed Mirage™ FX Nasal Mask

- Only four parts; make fitting and care easy
- New form-fitting SoftEdge™ headgear is kind to the face and springs to life, ready to fit and wear
- Flexible “butterfly wing” forehead support allows a dynamic range of fit and adjustment; the plastic does not contact the skin
- Lightweight, durable frame is strong enough to stabilize the mask on the face, and soft and flexible enough to accommodate user movement during sleep
- Dual-wall Spring Air™ cushion provides even pressure distribution with extra softness at the nasal bridge, reducing common discomfort in this sensitive area

The standard Mirage™ FX fits 90% of users. However, for users who require a wider fit, the Mirage™ FX wide offers more frame and cushion width, a shallower cushion and shorter frame length to comfortably seal against flatter nasal bridges.

662112	**MIRAGE™ FX NASAL MASK WITHOUT HEADGEAR**	**140.95**

From ResMed Pixi® Nasal Mask for Children

Pixi is made with both the child and their caregiver in mind. Every feature is carefully considered to address and improve therapy comfort, acceptance and overall experience for everyone involved.

- The cushion is soft, comfortable and minimizes pressure on children’s soft faces
- The headgear sits away from the child’s eyes and ears to reduce irritation and obstruction; you can also see your child’s eyes and face clearly for extra reassurance
- There is also a quick-release latch that makes taking the mask off easy, especially in an emergency

These features and more are designed to give you confidence that your child is being treated effectively; we’ve got the mask covered, so that you can be free to focus on emotionally supporting your child on their journey.

ResMed Activa™ LT Nasal Mask

Experience the laws of attraction

The latest nasal mask from ResMed with ActiveCell™ Technology. Its unique cushion features an "active cell" that expands and contracts to suit user movements and therapy pressure changes throughout the night. The mask feels as though it's drawn to the face — gently, yet securely, creating an unwavering seal.

- Same superior Mirage Activa sealing technology ... now lighter and more streamlined
- Dynamic cushion and MicroFit dial combination ... fitting is quicker and easier than ever
- One-piece, diffuse vent design ... overall quiet performance

ResMed AirFfit™ P10

The ResMed AirFit™ P10 nasal pillows mask retains the proven performance and reliability of the popular Swift™ FX mask series, yet it's approximately 50% lighter and 50% quieter. The AirFit™ P10 provides a stable seal and extremely high level of comfort and was designed for excellent usability. Its QuietAir™ vent diffuses air effectively and is ultra-quiet at a barely audible 21.4 dBA. The mask's QuickFit™ headgear is unobtrusive yet provides support with minimal facial contact, designed to encourage easy patient acceptance.

ResMed AirFit™ F10

The ResMed AirFit™ F10 full face mask delivers the comfort and reliability patients have grown to trust in our traditional full face masks, but in a compact design. Your line of sight isn't affected when you're wearing it, so you can wear your glasses, read or watch TV in bed with your mask on. The AirFit™ F10 is 15% lighter than the market-leading compact full face mask and it's our quietest compact mask in the CPAP full face mask category.

ResMed Quattro Air Full Face Mask

Drift off to a great night's sleep with Quattro Air, the lightest full face mask on the market. Its sleek, lightweight design with only four parts makes it easy to use for a comfortable and simple therapy experience.

- Patented dual-wall cushion with enhanced design at the nasal bridge makes it more comfortable
- Only four parts, the fewest of any leading full face mask, for easy cleaning and assembly
- Circular diffused vents quietly direct air away from you and your bed partner
- Flex-wing forehead support feels light on the face while providing the right amount of stability for a dependable seal

ResMed Mirage Liberty™ Full Face Mask

The latest mask in ResMed's Mirage™ line of interfaces offers less mask and more freedom in a minimalist design. With a fit range of over 90% of users, the Mirage Liberty™ is ideal for users seeking a comfortable alternative to conventional full face masks.

Features

- Unobtrusive design offers free field of vision
- Dual-wall Mirage™ cushion technology
- Dual-wall nasal pillows with trampoline action
- Ships with three pillow sizes for greater fit range
- Stable and comfortable headgear provides first-time fit

61300	**MIRAGE LIBERTY™, SMALL WITH HEADGEAR**	**303.90**

ResMed Mirage Quattro™ Full Face Mask

Fourth-generation design perfection

The Mirage Quattro™ is the fourth-generation full face mask that provides superior seal and personalized comfort to fit more than 95% of users. With its streamlined design, the Mirage Quattro™ offers a range of user-friendly features and professional benefits.

Features & Benefits

- Mirage™ dual-wall cushion with Spring Air™ technology accommodates movement during sleep (including jaw drop)
- MicroFit dial allows users to easily adjust forehead support for personalized fit and comfort
- Improved vent design reduces noise by over 50%
- 4 sizes (XS, S, M, L), including new XS size
- First-time fit reduces mask refitting and callbacks
- Increased fit range with reduced inventory (fewer mask parts, 33% fewer product codes)
- Set-and-forget headgear clips and slots save optimal fitting settings and allow for quick headgear removal

Circadiance Anew™ Full Face Mask

SleepWeaver Anew™ features a dual interface design that seals around both the nose and the mouth, with only soft cloth touching the skin. Unlike the hard plastic masks made by other manufacturers, Circadiance soft cloth technology allows the skin to breathe, without moisture accumulating between the mask and the user's skin. The unique loose fit provides added comfort and eliminates strap marks, and the open-face headgear design accommodates eyeglasses and allows virtually unrestricted vision.

Heated Humidifier Tubing Insulation

The tube wrap is a complementary accessory to ResMed's standard PAP tubing.
Tube wrap is aesthetically designed and functional, including unique features for improved therapy and compliance.

- **Reduces rainout**
  For people using heated humidification, the tube wrap reduces rainout in the tubing
- **Increases comfort**
  Soft, polar fleece makes tubing contact with the skin comfortable, reducing irritation from the tube
- **Decreases noise**
  Reduces the sound created from the tubing coming into contact with hard furniture edges such as tabletops or bed frames

Mask Pads

RemZzzs

- Provide a soft barrier that absorbs facial oils and moisture
- Assists with holding mask in place, enhancing efficiency
- Greatly reduces noisy air leaks and pressure blowout
- Reduces skin irritations and pressure marks
- Billable with a prescription to some insurances

This product is available for specific popular nasal and full face masks. A service representative can tell you if there is a matching RemZzzs for your mask.

BOX OF 30	*35.95*

CPAP Multi-Mask Sleep Aid

Discomfort while wearing the mask is a major factor contributing to noncompliance. During sleep, the mask presses and rubs against the user's face, which leads to discomfort and can also distort the mask, causing leaks. Contour Living has developed a solution. It's the CPAP Multi-Mask Sleep Aid.

14-101R-1-730	*CPAP MULTI-MASK SLEEP AID*	*59.95*

CPAP Max™ Pillow

Sleep Surface choice matches your comfort preference. Injection molded to provide perfect shape and support from edge to edge. Superior mask accommodation. Heat reduction for cool sleeping. Reduced perspiration for dry comfort. Head stays properly positioned, no effort required.

15-500R-1-916	*PILLOW CPAP MAX*	*59.95*

Mediflow® Waterbase® Pillow

A Mediflow® water pillow is easy to fill and fully adjustable to your own pillow preferences. If you prefer a firm therapeutic neck pillow, then fill the Mediflow® Waterbase® pillow with more water. If you enjoy a softer neck pillow, limit the amount of water that you put in these Mediflow® pillows. Either way your comfort is assured, because you are in complete control of the firmness of your pillow. You can modify your level of comfort whenever you desire.

1006	*MEDIFLOW™ WATERBASE™ PILLOW*	*46.45*

PROVENT™

A New Prescription Treatment for Obstructive Sleep Apnea (OSA)

PROVENT™ Sleep Apnea Therapy is a small, discrete, nightly-use disposable device that may be effective treatment for some cases of obstructive sleep apnea. It uses a proprietary MicroValve design that creates pressure upon exhalation (EPAP) to keep the airway open. The devices attach over the nostrils with a hypoallergenic adhesive The PROVENT™ Nasal Device is small, hassle-free and powered by your own breathing, so it requires no mask or machine. The device is available by prescription only and is FDA-cleared for the treatment of OSA.

Nasal Pad

The ResMed Gecko® Nasal Pad

Some people may experience some sealing and skin sensitivity issues, whether they are new patients adjusting to therapy or experienced users.

The Gecko™ nasal pad, is an accessory designed to help alleviate mask discomfort. The Gecko™ nasal pad is a comfortable, soft strip placed across the nasal bridge to help

- Reduce skin irritation and facial sores
- Minimize mask leak
- Improve overall mask comfort

Mask Cleaners

Contour Products CPAP Mask Cleaners

These cleaners are specially formulated to naturally clean and protect our mask without the use of harmful chemicals.
They effectively remove dirt, grease, oil and other organic residue from your mask. Contains 100% natural cleaners derived from coconut and other plant extracts.

- All natural ingredients
- Alcohol and latex free
- No animal testing

14-950-DS-899	*WIPES UNSCENTED 62 WIPES PER CONTAINER*	*9.95*
14-975-DS-901	*SPRAY UNSCENTED 8 OZ BOTTLE*	*9.95*

Citrus II Mask Cleaning Products

Citrus II CPAP Mask Cleaner is a unique formula designed for effective cleaning of all types of CPAP, BiPAP and Oxygen therapy masks, tubing and accessories. Safe and gentle to use, it will not harden, crack or deteriorate soft plastic with repeated use.
Use daily to remove dirt, oils and prevent the build-up of organic material. Citrus II CPAP Mask Cleaner cleans, deodorizes and refreshes, leaving no residual after-odors! Gentle ingredients are derived from corn, coconut and citrus.

Battery Options

The freedom to power your CPAP machine no matter where your world takes you!

- Made from high capacity lithium-ion cells
- Works with most makes and models of CPAP & Bi-Level machines
- Stylish and functional carrying case, connector tips, AC charger and DC power cord included
- Four stage LED power gauge on battery indicates remaining usage time
- Equipped with standard smart chargers keeping the battery topped off and ready to go as an emergency backup during power outages
- Aluminum alloy scratch resistant shell provides maximum durability

C-100	*SINGLE BATTERY PACK*	*328.95*
C-100 DOUBLE PACK	*DOUBLE BATTERY PACK*	*528.95*

Sleep Apnea Equipment Cleaning

These instructions are a guide for cleaning your CPAP equipment. Refer to the instruction manual that comes with your equipment for specific manufacturer recommendations.

Supplies needed

- Mild liquid dish detergent (for example, Ivory, Joy)
- Sink or basin
- Clean hand towel
- Device to hang tubing (for example, shower bar, towel rack, back of a chair)
- Distilled water for humidifier
- White vinegar

Mask

Wash daily because natural body oils on your face can wear down the mask, which can cause a poor mask-to-face seal.

1. **Remove the headgear from the mask.**
2. **Wash the mask in warm soapy water.**
3. **Rinse the mask under running water.**
4. **Shake off excess water.**
5. **Place the mask on a clean hand towel to air-dry or use the hand towel to dry the mask.**

Once a week, after washing the mask in soapy water, soak the mask in vinegar water (one part white vinegar and three parts warm water) for 30 minutes. Then follow steps 3 to 5.

Nasal pillows

Wash daily.

1. **Remove the nasal pillows from the gray or blue shell.**
2. **Wash the nasal pillows in warm soapy water.**
3. **Rinse the nasal pillows under running water.**
4. **Shake off excess water.**
5. **Place the nasal pillows on a clean hand towel to air-dry or use the hand towel to dry the nasal pillows.**

Humidifier

Wash daily. Water or moisture that sits in the humidifier when not in use readily begins to grow mold and fungal material. When these are blown with pressure through your nose, it can trigger allergies, rhinitis (clear, runny nose) and congestion. This makes tolerating CPAP difficult.

1. **Empty remaining distilled water from the humidifier.**
2. **Wash humidifier reservoir in the dishwasher if the humidifier instruction manual says it is safe to do so and you have a dishwasher. Otherwise, follow steps 3 to 6.**
3. **Wash the inside of the humidifier with warm soapy water.**
4. **Rinse the inside of the humidifier thoroughly.**
5. **Pour out excess water.**
6. **Use a clean hand towel to wipe the outside of the humidifier and allow the inside of the humidifier to air-dry.**

Once a week, after washing the inside of the humidifier with soapy water, pour vinegar water (one part white vinegar and three parts warm water) into the humidifier. After 30 minutes, pour out the vinegar water. Then follow steps 4 to 6.

Tubing

Wash weekly.

1. **Separate tubing from the CPAP unit and mask or nasal pillows.**
2. **Wash the tubing in warm soapy water.**
3. **Soak the tubing in vinegar water (one part white vinegar and three parts warm water) for 30 minutes.**
4. **Rinse the tubing under running water.**
5. **Shake off excess water.**
6. **Allow tubing to air-dry by hanging it so that water will drain out. Tubing also can be dried by reattaching it to the CPAP unit and turning the unit on for several minutes.**

Headgear

Wash weekly.

1. **Close the Velcro tabs so that they do not accumulate lint from the drying towel.**
2. **Hand wash the headgear in warm soapy water. Do not wash the headgear in the clothes washer.**
3. **Place the headgear on a clean hand towel to air-dry or use the hand towel to dry the headgear. Do not dry the headgear in the clothes dryer.**

Sleep Apnea Equipment Cleaning & CPAP Tips

Washable machine filters

Wash weekly when cleaning tubing.

1. **Remove the filter from the CPAP unit.**
2. **Wash the filter in warm soapy water.**
3. **Rinse the filter under running water.**
4. **Squeeze out excess water or press filter in a clean hand towel.**
5. **Allow the filter to air-dry. Keep filter out of direct sunlight.**
6. **Do not reinstall filter until it is completely dry.**

Disposable machine filters

Check monthly (more often if needed, for example, your CPAP unit is in a dusty room or you have a house pet).

1. **Remove the filter from the CPAP unit.**
2. **If obviously dusty, replace it. Do not attempt to clean a disposable machine filter.**

CPAP Unit

1. **Remove household dust from the CPAP unit by wiping it with a damp cloth.**
2. **Do not place liquids on top of the CPAP unit.**

Equipment Cleaning Addendum

Traveling

You can travel with your PAP equipment. You can use pop-up cleansing wipes such as baby wipes to clean your interfaces. Bottled drinking water or tap water can be used in the humidifier if distilled water is not available. If you can safely drink the water it can be in the humidity chamber. Always empty the humidifier completely every day and put it upside down so it dries out. Keep in mind distilled water is still the preferred water because it does not leave mineral deposits in the system, hose, or interfaces.

Important

- Do not keep or use cleaning supplies that are expired
- Do not use equipment that is too old or out of date
- Follow your manufacturer's instructions on when to replace outdated equipment
- Understand and follow your insurance's guidelines
- Do not put solutions in the humidifier that may be harmful to you; these include bleach and other cleaning products with similar strong chemicals
- Do not put products such as VICKS™ in the humidifier

CPAP Tips

My mask leaks.

Possible causes are

- Mask not positioned correctly
- Mask is the wrong size for you
- Body position is affecting the mask

People who sleep on the side can roll the end of the pillow so it is off the cheek. If you need to come in to be refitted for a different mask, bring along your mask and CPAP equipment. Some brands of masks can be replaced at no charge if brought in before 30 days of use. Your provider can tell you if you qualify.

Too much pressure!

Relax – many people need a bit of time to be comfortable with CPAP. Ask for advice if you need reassurance or additional instruction.

My skin is red or breaking down.

- Headgear too tight
- Use just enough tension on the headgear to effect a seal
- Irritation or allergic reaction
- Use a barrier such as cotton or moleskin in the affected area; you may need to see your physician
- Sometimes a mask of different materials will help alleviate the problem

My nose is uncomfortable – I have a dry throat.

- Review your humidifier use; you may need to increase the setting
- A chinstrap may be needed to prevent mouth breathing
- If snoring is occurring again, contact your physician

I have a head cold. Can I use my CPAP?

- You may need to seek the advice of your physician; CPAP can be uncomfortable under these conditions
- Generally, you can use your CPAP; consider using your humidifier and perhaps increase the setting to the next number

How to Obtain Supplies & How Often to Replace Items

How to Obtain Supplies

You may obtain replacement supplies by contacting the Mayo Clinic Store. An order paid by credit card can be shipped immediately; an order paid by check will be delayed until the check clears.

Your insurance company may pay for replacement sleep apnea supplies. Your insurance company may have replacement criteria that are similar to the Medicare guidelines below. You can call your insurer if you are in doubt.

An item costing over $125 or items together costing over $125 are shipped at no charge. Items less than $125 incur a $9.95 shipping charge.

We can provide premium shipping services including Next Day and Second Day. Charges for premium shipping services will be added to the invoice. International orders will be charged according to the destination.

Why should you obtain new supplies every six months?

- Masks get brittle and dirty from continued use
- Bacteria will build up inside the tubing and mask
- If you are ill while using your sleep apnea device, you will need to get new supplies once you are feeling better; viruses are known to stay alive in moist and confined areas for several weeks
- Expendable supplies are not intended to be used indefinitely
- Oils from your skin will cause the mask to lose elasticity, which you will compensate for by over tightening the straps; this may ultimately result in your facial skin breaking down
- Mask leaks will cause a loss of pressure and you will lose the benefits of your sleep apnea therapy
- Your skin may break down from continued use of a dirty mask

How Often May I Replace Items?

This chart is an approximate guide for Medicare and Medical Assistance (Minnesota and Wisconsin) for expendable replacements, which may be different from a commercial carrier's standards. HCPCS Code is a reference to the codes that Medicare uses to identify products.

HCPCS CODE	ITEM	MEDICARE SCHEDULE	MN MEDICAID SCHEDULE	WI MEDICAID SCHEDULE
A7034	Nasal Mask	1 per 3 Months	1 per Dispensing Up To 3 per 365 Days	1 per 3 Months
A7030	Full Face Mask	1 per 3 Months	1 per Dispensing Up To 3 per 365 Days	1 per 3 Months
A7027	Combination Oral/Nasal Mask (Liberty)	1 per 3 Months	1 per Dispensing Up To 3 per 365 Days	1 per 3 Months
A7044	Oral Interface (Oracle)	1 per 6 Months	1 per Dispensing Up To 3 per 365 Days	No Code
A7035	Headgear	1 per 6 Months	1 per 6 Months	1 per 3 Months
A7037	Tubing	1 per 3 Months	1 per Month	2 per 3 Months
A4604	Tubing With Heating Element	1 per 3 Months	1 per 3 Months	No Code
A7036	Chinstrap	1 per 6 Months	1 per 6 Months	1 per 3 Months
A7034 & A7035	Swift/P10/Pilairo/Opus Complete Unit	1 per 6 Months	1 per 6 Months	1 per 3 Months
A7033	Nasal Pillows	2 per 1 Month	1 Unit 1 Pair per Month	1 per 3 Months
A7028	Oral Cushion For Combination Oral/Nasal Mask (Liberty)	2 per 1 Month	1 per Month	1 per 3 Months
A7029	Nasal Pillow For Combination Oral/Nasal Mask (Liberty)	2 per 1 Month	1 Unit 1 Pair per Month	1 per 3 Months
A7032	Nasal Mask Cushion	2 per 1 Month	1 per Month	1 per 3 Months
A7031	Full Face Mask Cushion	1 per 1 Month	1 per Month	1 per 3 Months
A7038	Disposable Filter (Ea)	2 per 1 Month	3 per Month	2 per Month
A7039	Washable Filter	1 per 6 Months	1 per Dispensing Up To 3 Per 365 Days	1 per 3 Months
A7046	Humidifier Chamber	1 per 6 Months	5 per Month	4 per Month

Medicare and Medical Assistance require that we document that the person is continuing to use the sleep apnea device, the products need to be replaced due to damage or wear and that the recipient is not receiving home health care or is not in a skilled nursing facility.

Medicare Claim Filing & Billing Issues

This catalog is a continuation of the service provided in the Mayo Clinic Store. Products were carefully chosen for reliability and value. As a not-for-profit organization, proceeds from products purchased in our catalog support medical education and research at Mayo Clinic. This important work helps enhance the lives and well-being of people all around the world. Established in the late 1800s by Minnesota doctors William and Charles Mayo, Mayo Clinic is now one of the world's largest group practices staffed with more than 2,000 physicians dedicated to continuing the Mayo heritage of medical excellence and providing caring, individual attention to each patient.

Medicare Claim Filing Policy

The Mayo Clinic Store — Sleep Apnea Supplies is a participating Medicare B provider. We will file an assigned Medicare B claim form on your behalf. However, we must have specific information to file a claim.

Items Required for an Initial Set-Up for Medicare/Medical Assistance Recipients

- Physician's Prescription
- Home or in-facility sleep study demonstrating qualifying need for therapy equipment
- Face-to-Face physician visit documentation; this visit should indicate symptoms indicating the necessity of the sleep study
- Medicare information

Beneficiaries Entering Medicare

A person who was receiving supplies under commercial insurance & is transitioning to Medicare coverage must have a face-to-face evaluation by the treating physician after having first signed up for Medicare. The physician must document specific information in the medical record and we must have this information in our files before we can submit supplies for Medicare coverage.

Switching Providers

If a person would like to obtain supplies from our store we will need specific information to be able to send the items to medicare.

- A new prescription
- Copy of Home or in-facility sleep study demonstrating qualifying need for therapy equipment
- Face-to-face physician visit documentation demonstrating the reason the original sleep study was indicated
- Medicare information

Competitive Bid

In certain geographic areas of the country Medicare has used a bidding process for providers of sleep therapy supplies and equipment. We are not a contracted provider with Medicare in these competitive bid areas and consequently cannot provide sleep therapy equipment and supplies to you and bill Medicare. We can assist you in finding a store in your area that may be able to provide services for you. In some instances we can help traveling patients who reside in a competitive bid area with supply needs. Again, or staff will help you determine if it is appropriate for us to provide you with supplies.

Billing Issues

If you have questions or concerns about your billing, **please call our billing office at 888-303-9354 prompt #2.** We specifically do not state that your insurance(s) will cover the cost of the equipment and supplies. Coverage determination is between the insurer and the insured. The user is responsible for payment of amounts not covered by insurance.

Medicare Capped Rental Information for CPAP/BiPAP/VPAP (flow generator)

This information is provided to help the user understand how Medicare pays for these types of durable medical equipment. Medicare will purchase the humidifier, tubing, mask and headgear. Only the flow generator is a rental item.

Months 1-3

Medicare will pay 80% of the Medicare-allowed amount from the Medicare fee schedule. The allowed amount varies from state to state.

For Example	
$135.45	Monthly rental of the device
$105.29	Medicare allowable
$84.23	Medicare pays 80%
$21.06	Remainder of allowable If no other insurance, it is patient's responsibility. If there is a supplement, it may pay 80% of the 20% Medicare doesn't pay, or in some cases, all of what Medicare doesn't pay.

Months 4-13

Medicare reduces the allowed amount from the fee schedule by 25%. The amount paid by Medicare is 80% of the reduced allowed amount.

For Example	
$135.45	Monthly rental of the device
$78.92	Medicare allowable
$63.14	Medicare pays 80%
$15.78	Remainder of allowable If no other insurance, it is patient's responsibility. If there is a supplement, it may pay 80% of the 20% Medicare doesn't pay, or in some cases, all of what Medicare doesn't pay.

After the 13th month billing is completed, the patient has ownership of the flow generator

You will receive a letter at approximately three months and six months asking if you are using the equipment. We must document that you are continuing to use the equipment. We must have this documentation in our files to facilitate billing to Medicare. It is very important for you to return these letters promptly. If you are not using the equipment, you may need to return it.

Medicare Capped Rental Information for CPAP/BiPAP/VPAP (flow generator)

You have been prescribed Continuous Positive Airway Pressure (CPAP) for treatment of obstructive sleep apnea. In most patients, CPAP is used indefinitely. Medicare covers CPAP, but the initial coverage is limited to three months. Long-term Medicare coverage depends on demonstrating to your treating doctor that you are using your CPAP on a regular basis.

Here are the specifics

The following two things must happen within the first 90 days on CPAP for Medicare to cover your CPAP indefinitely

1. Use of CPAP on a regular basis: During the first three months Medicare mandates that you must use CPAP at least four hours per night on at least 70% of nights during a consecutive 30-day period. Ideally, CPAP should be used all night, every night. Without it, your obstructive sleep apnea will come back. However, it is understood there will be circumstances when CPAP use will be temporarily disrupted, such as when you have a bad cold or are traveling. To meet the Medicare rules, you must use your CPAP a minimum of four hours per night for at least 21 nights over any given consecutive stretch of 30 days. Don't worry about keeping track of your hours of CPAP use. Your CPAP will have an internal usage meter.

2. Face-to-face visit in the Mayo Center for Sleep Medicine 31-90 days after starting the CPAP. We need to make sure you are benefitting from CPAP and using it on a regular basis. This follow-up cannot be done by phone. You are certainly welcome to call the Center for Sleep Medicine if you need troubleshooting help with CPAP, but you must be seen in person to review matters before 90 days with CPAP has passed. It is crucial that you bring your CPAP equipment to the follow-up appointment. If you are not meeting the CPAP use requirements, several more visits for adjustments may be necessary until you establish regular CPAP use.

If conditions 1 and 2 above are not met after 90 days, Medicare coverage for CPAP will stop. If you decide to restart CPAP anytime in the future, Medicare requires a face-to-face visit in the Mayo Center for Sleep Medicine and a repeat sleep study.

Notes:

Private Insurance Claims & Additional Information

Warranty & Repairs

If your sleep therapy equipment should have a problem, we can assist you with arranging for factory service. We will assist customers to whom we have sold equipment. Customers who have obtained equipment elsewhere should contact their provider for assistance.

Manufacturers vary on how they handle repairs. Please allow some time so we can contact the manufacturer to see how it prefers to handle the repair. Sometimes a unit in warranty will be simply exchanged for a new unit; other times it may be necessary to send the device in for evaluation. If your device is in warranty and it needs to be sent in for repair, we can provide you with a device to use while yours is being repaired.

Repairs out of warranty — Repair costs may be submitted on your behalf to your insurance company. Insurers vary on coverage for repairs. You may be liable for a portion or all of the repair cost. We can rent you a device to use while your unit is being repaired. This rental cost can be sent to insurance, but you may be liable for a portion or all of the cost. Equipment out of warranty sent to the manufacturer will incurr a $75 charge to cover shipping and handling.

Pricing Policy

The Mayo Clinic Store staff cannot discount new equipment and supply prices from those in the catalog or current at the time of sale. Previously used sleep equipment may be available at a discounted price.

Private Insurance Claim Filing Policy

If you have private insurance, we will gladly file a claim to your insurance company. At the time of your order, you will need to provide us with your insurance information, policy number, date of birth and diagnosis information. We may also need access to your sleep studies. A physician's prescription is required. We cannot file a claim without a valid prescription. Having your insurance card in your possession is very helpful, as there is specific information that can assist in claim processing.

We participate with many insurance companies. We can bill many more insurance companies, but the carriers we have participation contracts with will generally provide better coverage. The ultimate determination of benefits is between you and the insurance company. We can assist the processing of claims, but we do not have control over how well an insurer will pay.

Return Policy

The Mayo Clinic Store — Sleep Apnea Supplies will accept returns up to 30 days from the original invoice date. The original receipt or invoice is required. If the issue is related to the device not meeting your needs or being uncomfortable, please contact us as soon as possible. **Masks, tubing, clothing, pillows and similar accessories are considered to be single patient use — disposable; therefore, not returnable.** It is difficult to predict how long these items should last in routine use. Their longevity is related to many factors such as cleaning frequency, amount of usage and interaction between the device and the person. You can prevent interruptions in your therapy by anticipating when items are nearing the end of their useful life and order another to be available when needed.

Mask Replacement

Some of the mask manufacturers will allow the return of a mask if it does not prove to be an adequate fit. If there is a problem with a mask, it must be of a participating manufacturer's mask and returned prior to 30 days of use. Your store representative can advise you if you would qualify for replacement under this circumstance.

Mask replacement at no charge will be allowed when the mask replacement is for a mask of equal or less cost than the original. Examples: A nasal mask device can be exchanged for a different nasal mask; a full face mask can be exchanged for a different full face mask or a nasal mask. If a change from a nasal mask to a full face mask is necessary, the new full face mask will be billed.

Sleep Apnea Device Plan of Care

New Patient Set-up

Our goal is to provide our customers with the training and education to be successful in using your new sleep apnea equipment and supplies. Situations may occur that make using the equipment difficult or uncomfortable. We can offer some assistance either in person or by telephone support. Please do not hesitate to contact us for assistance.

ANTICIPATED NEEDS	GOALS	ACTION PLAN
Contact Information	Patient can contact store for support	Phone number affixed to sleep apnea device, tag on carrying bag, & in the catalog
Equipment assembly operational controls	Patient can access factory equipment manual for assembly of the equipment and operating device controls	Equipment manual is located in the carrying case
Cleaning	Patient has information available to clean sleep apnea equipment	Reference to section on equipment cleaning in this catalogue and operator's manual
Supply replenishment	Patient can identify frequency with which most insurers will allow replacement of expendable supplies	Reference to section on supply replacement in catalog. Patient may also consider contacting insurance company directly for guidelines
Safety	Patient can identify safe practices within the home concerning personal safety and external threats	Reference to section on safety in catalog
Emergency response	Patient can identify actions to perform in the event of an emergency	Dial 911 or local emergency response number as deemed appropriate

Oxygen Concentrators

Portable Oxygen

Portable oxygen systems are available to provide mobility to oxygen users making shopping, medical visits and recreation possible. Mayo Store staff can assist the user to find a portable system to best meet the user's needs.

Portable concentrators are available for purchase or rental depending on patient needs.

PORTABLE OXYGEN SYSTEM	$65.00 PER MONTH RENTAL

Stationery Oxygen

Until now, oxygen concentrators have been very similar — heavy, bulky, noisy or require frequent maintenance. Stationary concentrators today deliver features homecare providers want and patients deserve.

- Lightweight
- Smaller and sleeker
- Easy to store and transport
- Low maintenance
- Quiet
- Simpler to use and maintain

STATIONARY OXYGEN CONCENTRATOR	**$403.00 PER MONTH RENTAL**

Home Oxygen Service Locations

Home oxygen services are available from the Mayo Clinic Store in selected areas. If you have questions or concerns please contact your oxygen provider.

Key Messages

- Your health care provider has prescribed supplemental oxygen for you, this is called supplemental oxygen therapy; you may hear it called home oxygen therapy
- Breathing supplemental oxygen increases the amount of oxygen in your blood, which may reduce shortness of breath and prevent other health complications
- Supplemental oxygen therapy may allow you to feel better and lead a more active life even though it may mean some lifestyle changes
- You may need to use supplemental oxygen for a short while after an illness, or you may need to use it long-term
- Many systems are available for receiving supplemental oxygen, the technology involved in medical equipment is changing all the time; your health care provider works with you to find the system that meets your needs; the most important consideration is that you have a system that delivers the amount of oxygen you need
- Be sure to attend all follow-up appointments; this is important in helping you and your health care provider monitor your progress
- You are the most important member of your health care team; good management of your health depends on your active participation
- Contact your health care provider if your medical symptoms or condition changes or if you have questions or concerns; if you have concerns about your equipment, contact your medical equipment supplier

General information

- Your health care provider has prescribed supplemental oxygen therapy; breathing supplemental oxygen increases the amount of oxygen in your blood, even though using supplemental oxygen may mean a change in your lifestyle, it may allow you to feel better and lead a more active life; this may help reduce shortness of breath and prevent other health complications
- Oxygen is a tasteless, colorless, odorless gas that makes up about 21 percent of the air you breathe; inhaled through the nose or mouth, oxygen eventually reaches the air sacs in the lungs (alveoli), it then enters the bloodstream and is carried to all parts of your body
- If you have a low level of oxygen in your blood (hypoxemia), you may have breathing troubles, exercising difficulties, headaches, fatigue, memory loss, depression or confusion; some people have no symptoms, but may still need supplemental oxygen
- Your prescription for supplemental oxygen will indicate
  A rate of oxygen flow (flow rate) listed as liters per minute (LPM). The prescribed flow rate may vary for different activities (for example, during sleep, at rest or with exercise)
- How long and when to use the supplemental oxygen each day (for example, with exercise, during sleep, or a specific number of hours)
- Used as prescribed, oxygen is not addictive and is generally not associated with any unpleasant side effects; not using oxygen as prescribed can be harmful
- Depending on your condition, you may need oxygen all the time or only when you exercise or sleep
- Keep a copy of your prescription for reference; always keep a copy with you when traveling

When Using Oxygen

- Never smoke or allow the oxygen to be within 10 feet of any open flames
- This could include: candles, gas range/oven, furnace etc.
- Do not allow anyone to smoke in the home where the oxygen is used
- Oxygen is not flammable, but is combustible
- Change nasal cannula every 1–2 weeks, this also applies for tracheostomy masks
- If you have a dry nose, use water-based products
- Do not use oil/petroleum based products anywhere near the oxygen
- Examples of what to use: KY Jelly, saline spray
- Never change your prescribed flow rate without first checking with your doctor
- Do not allow untrained persons or children to adjust oxygen equipment
- Inform your local emergency responders (such as the police and fire department) that you use oxygen; this can help them better help you in an emergency

Oxygen Concentrator

- Always keep the concentrator in a ventilated area with at least 12 inches of clearance
- Once a week the filter/intake of the concentrator should be cleaned or vacuumed
- Check the concentrator daily to make sure the equipment is working properly
- Oxygen tubing should never be longer than 50 feet
- Notify your electric company that oxygen equipment is being used in your home; this prevents the company from discontinuing service during peak use times; also, in the event of a power failure, your home will be on a priority list to get service back

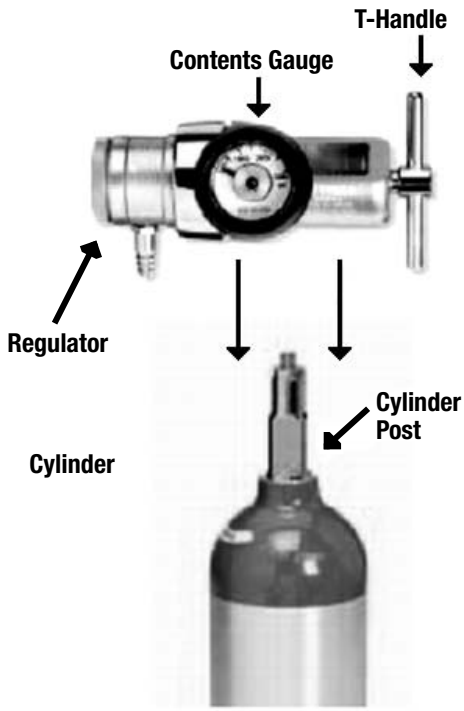
Portable Oxygen

- Do not leave oxygen equipment on when not in use
- Store cylinders in a well–ventilated area, do not store in a closet
- Keep cylinders away from heat, for every degree over 70˚ F, the tank will increase by 5 psi
- Keep cylinders secured in a rack or laying down in a safe place
- Do not abuse or handle oxygen cylinders roughly

Traveling With Oxygen

- Never transport cylinders in the trunk or rear of your vehicle (backseat is okay)
- Always secure cylinders so they do not roll around
- When the temp outside is above 70˚ F, please allow for proper ventilation
- If you are planning on making long distance travel, please contact your oxygen provider as soon as you have made traveling arrangements

Using Your Oxygen Regulator



Attaching the oxygen conserving device to the cylinder

WARNING: To prevent injury from cylinders tipping over, do not use cannula tubing lengths over 7 feet with small compressed oxygen cylinders. Unattended cylinders should be secure in a cylinder stand.

Attaching Your Oxygen Regulator to the Cylinder

Step 1: Remove plastic dust cap and plastic washer from cylinder post.

Step 2: Loosen the T-handle on the regulator.

Step 3: Lower the oxygen regulator over or connect it to the post of the cylinder.

Step 4: Align the pins in the regulator to the holes in the cylinder post.

Step 5: Hand-tighten the T-handle until the regulator is secure.

Using Your Oxygen Regulator

Step 1 Open cylinder with the key provided.

Step 2 Check contents gauge on regulator.

NOTE: *Pressure reading of* *2200-2000 psi = Full*
1000 psi = ½ Full
500 psi = ¼ Full

Step 3 Attach the standard nasal cannula to the regulator and to your nose and face.

Step 4 Turn the flow selector/rotary selector to the correct prescription flow setting.

Step 5 Breath normally

Step 6 Consult Cylinder Duration chart for estimated usage time.

NOTE: *cylinder duration is directly related to pressure reading on the content gauge*

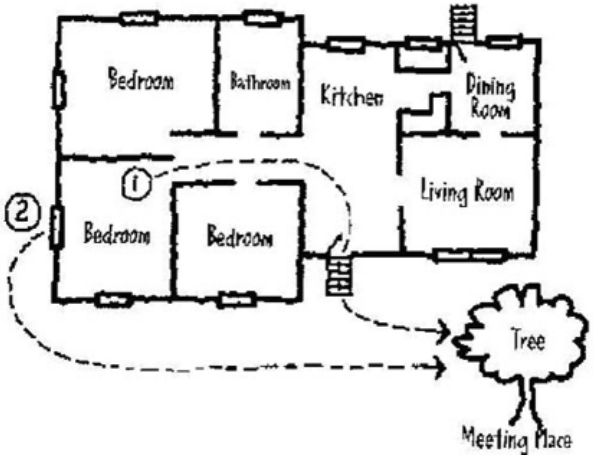
Example:
Full E Cylinder @ 2 lpm, lasts approx. 5-7 hours
½ E Cylinder @ 2 lpm, lasts approx. 2.8 hours

Step 7 When you are finished using the oxygen regulator, turn the cylinder off by using the key provided and turn the flow selector/rotary selector to the "0" position

Home Safety Information

E.D.I.T.H Exit Drills In The Home fire safety information

Draw a floor plan of your home and mark two ways out of every room, especially the bedrooms. Go over these escape routes with every member of your household.



Agree on a meeting place outside your house where every member of the household will meet after escaping a fire and wait there for the fire department to arrive. This lets you count heads to make sure everyone is there, and to tell the fire department if anyone is missing.

Practice your escape plan at least a couple times a year. Hold a fire drill in your home. Appoint someone to be a monitor and have everyone take part in the drill. A fire drill is not a race, but practice to get out quickly ... remember to be careful.

Make your fire drill realistic ... pretend that some exits are blocked by fire and practice getting out different escape routes. Pretend that the lights are out and that some escape routes are getting smoke in them

Smoke Alarms With working Smoke Detectors – your risk of dying in a home fire is cut almost in half. Install Smoke Detectors outside of every bedroom and on every level of your home including the basement. Follow the installation instructions carefully. Change Smoke Detector batteries at least once every year.

Home Fall Prevention Checklist

Each year, thousands of older Americans fall at home. Many of them are seriously injured, and some are disabled. Falls are often due to hazards that are easy to overlook but easy to fix. This checklist will help you find and fix those hazards in your home. The checklist asks about hazards found in each room of your home. For each hazard, the checklist tells you how to fix the problem. At the end of the checklist, you'll find other tips for preventing falls.

- **FLOORS** Have a clear path from room to room
- **STAIRS AND STEPS** Fix loose or uneven steps; make sure carpet is firmly attached to every step
- **KITCHEN** Move items in your cabinets; keep things you use often on the lower shelves (about waist level), if you must use a step stool, get one with a bar to hold on to; never use a chair as a step stool
- **BATHROOMS** Put a non-slip rubber mat or self-stick strips on the floor of the tub or shower; consider putting grab bars inside the tub and next to the toilet
- **BEDROOMS** Put in a night-light so you can see where you're walking; some night-lights go on by themselves after dark

Other Things You Can Do to Prevent Falls

- Have your doctor or pharmacist look at all the medicines you take, even over-the-counter medicines; some medicines can make you sleepy or dizzy
- Have your vision checked at least once a year by an eye doctor; poor vision can increase your risk of falling.
- Think about wearing an alarm device that will bring help in case you fall and can't get up

Preparing for an Emergency

All states have disasters. It is smart to prepare for the unexpected. Before a disaster, learn how you will know there is an impending hazardous event. Familiarize yourself with the signs of events that come without warning and know the local advance alerts and warnings and how you will receive them. Knowing about the local emergency plans for shelter and evacuation and local emergency contacts will help you develop your household plan and will also aid you during a crisis

1. **Make your Emergency Kit**
   You can start with the basics and add on over time.
2. **Make a Family Communications Plan**
   If you are separated and cannot get in touch with your family, each family member should call the same contact out-of-state. Have an emergency contact in your local area, a contact out-of-state, and a neighborhood meeting place.
3. **Make a Family Evacuation Plan**
   In an emergency you may need to leave your home quickly. Make sure everyone knows the plan. Include a plan for pets in case you need to evacuate.
4. **Make a Plan for People with In-Home Needs**
   Consider helping neighbors who may have special needs. Identify a neighbor or family member who can help if a care provider cannot get to your family member with special needs.

Home Emergency Kit

In an emergency, having these few items in your home can help keep your family safe.

- ☐ Water – at least 1 gallon per person per day
- ☐ Wired telephone
- ☐ Can opener (non-electric)
- ☐ First aid kit
- ☐ Battery powered radio
- ☐ Flashlight & battery-powered lantern
- ☐ ABC type fire extinguisher
- ☐ 3-day supply of canned or dried foods
- ☐ Smoke detectors and carbon monoxide detectors
- ☐ 3-day supply of baby food and formula
- ☐ Prescription medication
- ☐ Hand cleaner/sanitizer

If you lose power, eat the food in your refrigerator first. Without power, a refrigerator should keep food at a safe temperature for about four hours.

Grab Bag

You may have to leave your home quickly in an emergency. Some important items are

- ☐ One day's clothing and shoes for each family member
- ☐ Towels, blankets or sleeping bags
- ☐ Personal care products (diapers, feminine hygiene products)
- ☐ Flashlight and extra batteries
- ☐ Prescription medications & CPAP
- ☐ Granola bars/trail mix
- ☐ Extra set of car keys
- ☐ Cash & prepaid phone card
- ☐ Copies of important documents: Medical and prescription information, passports, birth certificates, driver's license, insurance papers, contact list of family and friends

Ordering Information

Order Processing

All orders are processed when payment is received. Therefore, if you are paying by check your order may be delayed for up to one week. Items are shipped immediately if participating insurance coverage is available and required documentation is complete.

Our fill rates are among the highest in the industry. It is our policy to pay freight on back orders.

Returns & Exchanges

We will accept returns on most products purchased within 30 days for a merchandise refund or exchange. Products beyond 30 days from date of purchase, special orders and shipping and/or handling charges are not returnable or refundable.

- All merchandise returns or exchanges must have the original receipt and are subject to inspection and must be in resalable condition and contain the original packing materials, manuals and blank warranty cards. Any merchandise deemed unsuitable for resale will not be accepted for exchange or refund.
- Due to health regulations, sanitary and safety concerns, merchandise that has come into direct contact with the human body or has been worn cannot be returned or exchanged. Contact Customer Service at **888-303-9354** for complete details prior to placing your order.
- Mayo Clinic Store will only pay return shipping costs if returned items shipped due to our error.
- Refunds will be issued via original payment method.
- Return Merchandise Authorization (RMA) number must be obtained from our Customer Service Department for any and all returns.

  ! To obtain your RMA number, simply call toll-free at **888-303-9354** during our hours of operation.

  ! Item(s) being returned must be returned **within 10 days** of receiving your Return Merchandise Authorization number.

Medicare Claim Filing Policy

Mayo Clinic Store will file a Medicare B claim form on your behalf. However, **YOU AND YOUR PHYSICIAN MUST** provide us with the following information:

- Name and address of the Medicare recipient
- Medicare number
- Date of birth
- Your doctor's prescription for the item (signed and dated on or before the date of your order) with:
  - Doctor's National Provider Identifier Number
  - Diagnosis code and description

Please mail the necessary papers and information with your order.

Inquiries about reimbursement should be made through your Medicare office. Please allow 10 to 12 weeks for reimbursement.

Please Note

- Mayo Clinic Store does not guarantee Medicare reimbursement. Reimbursement is based on Medicare's assessment of the patient's need. Reimbursement amount is determined by Medicare and may vary from state to state. This may be less than the purchase amount.
- Medicare will send the explanation of benefits and any reimbursement directly to the beneficiary.
- Certain items in this catalog may require a Certificate of Medical Necessity (CMN) to be completed by the patient's doctor. We will send the appropriate CMN to your doctor once we have received the prescription. Please note that a claim requiring a CMN takes longer to process.
- Please be aware: Medicare may change the allowable without notice to you.

Private Insurance Claim Filing Policy

If you have private insurance, we will gladly file a claim to your insurance company. At the time of your order, you will need to provide us with your insurance information, policy number, date of birth and diagnosis information.

To view catalog online, go to www.MayoClinic.org.

Prices are subject to change without notice.
